

PRESSE RELEASE

EBSCON 2022: Focus on the sovereignty of the European electronics and semiconductor industry.

"Building Bridges for Tomorrow" - EBSCON becomes more international with a strong focus on Europe.

Villach/Graz, August 24th 2022. Electronic Based Systems (EBS) are components and devices with micro- and nanoelectronics as well as embedded software. They are the foundation for digital products and services. Current opportunities and challenges for the European EBS industry and their impact on society are at the centre of EBSCON 2022 with the topics of sovereignty, sustainability and security.

After a successful premiere last year, the Silicon Alps Cluster invites to the Electronic Based Systems Conference (EBSCON) in Graz for the second time on October 5th 2022. The individual EBSCON panels will focus on the opportunities for start-ups and SMEs, "Security of Things" and energy efficiency in the field of Electronic Based Systems.

EBSCON 2022 will be held as a sustainable event according to the criteria of "Green Events Austria".

Date:

Wednesday, October 5th 2022, programme start 09.30 a.m./registration 08.30 a.m.

Location: Congress Graz, Schmiedgasse 2, 8010 Graz
